

NH Project FIRST

First Responders Initiating Support, Recovery & Treatment

If you think someone is overdosing, don't hesitate: **CALL 911**

Worried YOU'LL be arrested because there are illegal drugs present?

NH law* protects from arrest, prosecution, or conviction anyone who requests medical assistance to save the life of an overdose victim.

Don't waste time hiding evidence of drug use - **CALL 911**

- * **CALL 911**, even if you have given them naloxone
- * Stay with them until help arrives

*NH RSA 318-B:28-b Immunity From Liability.

FR-CARA Cooperative Agreement #SP080286.

Signs of an overdose:

- ◆ Not responsive/can't wake up
- ◆ Body is limp
- ◆ Blue/dark purple fingernails, lips
- ◆ Breathing is slow or stopped
- ◆ Pulse is slow or stopped
- ◆ Snore-like gurgling noise
- ◆ Awake but unable to talk

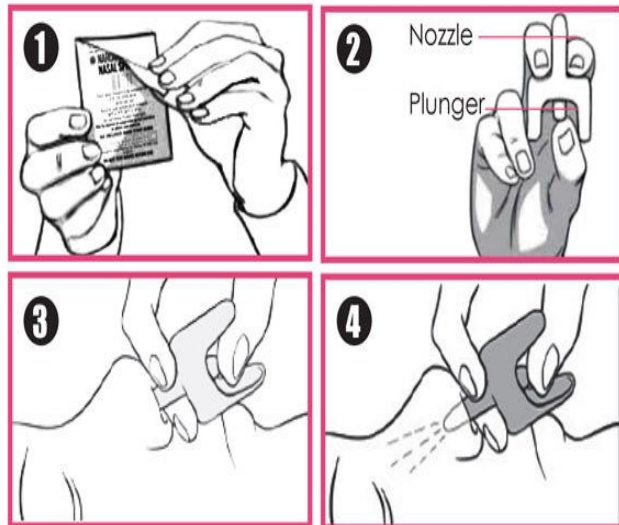

If you suspect an overdose:

- ◆ Call 911, give clear address and location
- ◆ Open the person's airway and give rescue breaths
- ◆ Administer Naloxone nasal spray ("Narcan")
- ◆ Stay with them until help arrives

Store Naloxone out of direct sunlight and between 59-86°F. Return for refill if past the expiration date printed on package.

Note: Giving Naloxone to a person who is not overdosing will not harm them.

How to administer Narcan Nasal Spray
