

Overdose Fatality Review Start-up Resources

Overdose fatality reviews (OFRs) are confidential death reviews conducted by local multidisciplinary teams to improve overdose prevention and intervention strategies.

OFRs are becoming a cornerstone of successful community responses to substance-related deaths. By combining collaboration between public safety and public health providers with effective use of data to identify system gaps, OFRs build trust among local stakeholders so they can fully comprehend the substance-related deaths challenge facing them and, by working together to implement community-specific recommendations, prevent future deaths.

Jurisdictions interested in establishing their own OFRs should consider the resources listed below as a road map that will

enable them to understand the methodology, commitment, and investments required to assemble an effective OFR, as well as the practical steps they can take to start their own teams. The resources were compiled through a partnership between the Centers for Disease Control and Prevention (CDC) and the Comprehensive Opioid, Stimulant, and Substance Use Program (COSSUP) (formerly known as the Comprehensive Opioid, Stimulant, and Substance Abuse Program [COSSAP]), a U.S. Department of Justice program supported by the Bureau of Justice Assistance (BJA). They can be found individually on the OFR Tools website, www.OFRTools.org.

OFR Tools Website	An online package of tools, expert guidance, and training designed to provide prospective OFR teams self-guided direction through the steps necessary to build a successful team on a foundation of coalition building, data collection, and a commitment to overdose prevention. Site visitors are equipped with a practitioner's guide to OFR implementation; an array of supplemental resources, including sample meeting agendas, work plans, and data collection templates; and a user-friendly online form to request OFR training and technical assistance (TTA). This website was developed in partnership between COSSUP and the CDC.	https://OFRTools.org/
Overdose Fatality Review: A Practitioner's Guide to Implementation	The goal of the toolkit is to provide essential information to build a successful OFR process with a strong foundation in coalition, data collection, and prevention. The toolkit content draws on other fatality reviews and the authors' practice-based knowledge. It is organized into five modules focused on recruiting, planning, and facilitating OFR meetings; collecting OFR data; and building a recommendation plan.	https://www.OFRTools.org/toolkits/toolkit-detail-overview
OFR National Standards	These national standards were developed to ensure the effectiveness of OFRs and are based on multiple state and local jurisdictions' OFR and other fatality review practice-based experience.	http://s.iir.com/XnMZZvki
Public Health and Safety Team (PHAST) Toolkit	Developed by the CDC as a companion to the OFR Toolkit, the PHAST Toolkit is designed to reduce opioid overdose deaths by using aggregate data and increasing collaboration among all sectors, with a particular focus on public health and public safety agencies. PHAST engages partners through the shared understanding, optimized capacity, and shared accountability (SOS) process.	https://phast.org
New to OFR Virtual Training	In this 3-hour training, participants will receive information on how to staff, recruit, plan, and facilitate successful OFR meetings, as well as identify measures of success and strategies to store data and implement identified recommendations.	http://s.iir.com/WmpjP9BZ

OFR Start-up Resources

National Forum on Overdose Fatality Review	Held annually, this in-person convening highlights how OFRs are identifying and implementing recommendations to prevent substance-related deaths in communities across the country.	https://www.OFRTools.org/learn/forums
Mock OFR Meetings	Two mock OFR meetings are conducted by actual OFR team members: one from an urban community and the other from a rural community.	Urban OFR Meeting
		Rural OFR Meeting
OFR Data System	COSSUP and the CDC developed the OFR Data System to enable communities to capture key information from OFRs and monitor recommendations to develop a framework of accountability. Open to all OFR sites, the system offers guidance on both inputting and analyzing data and on data sharing and confidentiality agreements, as well as information on relevant federal and state privacy laws.	https://www.OFRTools.org/toolkits/datasystem-toolkit
OFR Mentor Program	The BJA OFR Mentor Program encourages the uptake of promising peer practices by new OFR sites by building bridges between nascent OFR teams and established ones that have demonstrated success. Participating OFR peer mentees are matched to experienced OFR peer mentor sites, which provide consultation and support through direct communication and virtual OFR site visits to see firsthand how OFRs work in practice.	https://www.OFRTools.org/learn/mentor-program
OFR Information Sharing Guidance	The Legislative Analysis and Public Policy Association (LAPPA), in partnership with the Institute for Intergovernmental Research (IIR), developed information sharing fact sheets to provide OFR teams with an understanding of what members legally can and cannot share in regard to federal law (such as 42 Code of Federal Regulations and the Health Insurance Portability and Accountability Act [HIPAA]).	https://www.OFRTools.org/toolkits/information-sharing-toolkit
OFR Message Exchange	The OFR Message Exchange is a platform for OFR team members to engage with each other, share information, and problem-solve.	https://www.OFRTools.org/Exchange
Request OFR TTA	OFR teams may request customized TTA from OFR practitioners and experts directly via the OFR Tools website.	https://www.OFRTools.org/TTArequest
Register Your OFR Team	OFR coordinators may register their teams with the OFR Tools website.	http://s.iir.com/GxF6Hh4V

About IIR and COSSUP

IIR serves as the connecting point for COSSUP TTA efforts and collaborates with BJA leadership and fellow TTA providers to work directly with COSSUP site-based grantees. IIR's role includes guidance and contributions by subject-matter experts in priority COSSUP areas of focus; coordination of the COSSUP TTA network's cadre of experts and providers; publication production and design of COSSUP resources; planning, coordination, and delivery of national-level trainings and working group meetings; COSSUP Resource Library development and maintenance; coordination of distance-learning opportunities and resource dissemination; and other complementary activities. To learn more about COSSUP, visit www.cossup.org and follow us on Facebook and X (formerly known as Twitter).

About BJA

BJA provides leadership and services in grant administration and criminal justice policy development to support local, state, and tribal law enforcement in achieving safer communities. To learn more about BJA, visit www.bja.gov and follow us on Facebook (www.facebook.com/DOJBJA) and X (formerly known as Twitter) (@DOJBJA). BJA is part of the U.S. Department of Justice's Office of Justice Programs.

This project was supported by Grant No. 15PBJA-21-GK-01074-MUMU awarded by the U.S. Bureau of Justice Assistance. The Bureau of Justice Assistance is a component of the Department of Justice's Office of Justice Programs, which also includes the Bureau of Justice Statistics, the National Institute of Justice, the Office of Juvenile Justice and Delinquency Prevention, the Office for Victims of Crime, and the Office of Sex Offender Sentencing, Monitoring, Apprehending, Registering, and Tracking (SMART). Points of view or opinions are those of the presenters and do not necessarily represent the official position or policies of the U.S. Department of Justice.
