

RxCheck

A Real Solution for Nationwide Prescription Drug Information Sharing

Proven - Dynamic - Flexible - Secure

Drug overdose deaths have been rising steadily over the past two decades and have become the leading cause of injury death in the United States.

Prescription drug information sharing strategies are an important part of combatting this growing national problem. The value to prescribers and dispensers of sharing prescription data across state lines and integrating prescription data access with electronic health record systems is well established.

RxCheck provides states the ability to easily participate in the growing movement of nationwide Prescription Drug Monitoring Program (PDMP) data sharing and integration.

A Practical Solution Available Now

- A solution governed by participating states
- No cost to states or their PDMP users
- Enables states to securely and efficiently share PDMP data across state lines
- Fully conforms to all tenets of the Prescription Monitoring Information Exchange national architecture
- Allows states to control the implementation and connection process

Data Integrity

- Each state maintains ownership and complete control over access to their PDMP data
- End-to-end security of protected health information (PHI) and personally identifiable information (PII)

Implementation Assistance

- Federal funding available to support implementation and connection
- Full technical documentation and support materials readily available

The Future for PDMP Data Sharing and Integration

- Regular enhancements based on participating state priorities
- **RxCheck** console to support state PDMP administrators
- State routing service capability to support integration with Health Information Exchanges and Electronic Health Record systems
